

Childhood Cancer Survivors: A Practical Guide to Your Future, Nancy Keene, Wendy Hobbie, Kathy Ruccione, O'Reilly & Associates Incorporated, 2006, 0596528515, 9780596528515, 436 pages. More than 270,000 children, teens, and adults in the United States are survivors of childhood cancer. The surgery, radiation, chemotherapy, and stem cell transplants used to cure children can affect growing bodies and developing minds. If survivors know of these potential problems, they can take steps to identify, cope with, or treat them early if they do develop. The second edition of Childhood Cancer Survivors charts the territory for survivors by providing state-of-the-art information about: Medical late effects from treatment Emotional aspects of surviving cancer Schedules for follow-up care Challenges in the healthcare system Lifestyle choices to maximize health Discrimination in employment of insurance Authors Keene, Hobbie, and Ruccione are experts in the field of childhood cancer. They have written, spoken, and advocated about all aspects of survivorship. Importantly, they have also talked to hundreds of survivors, with a wide range of issues and triumphs, and have included many of their stories. Woven throughout the text are stories from more than 100 survivors and parents. Authors Nancy Keene, Wendy Hobbie, and Kathy Ruccione are experts in the field of childhood cancer. Keene is the mother of a survivor of childhood leukemia and the author of several books including Childhood Leukemia, Childhood Cancer, Educating the Child with Cancer, and Chemo, Crazyness & Comfort. Hobbie is coordinator of the Long-Term Follow-Up Clinic at the Children's Hospital of Philadelphia. Ruccione is Co-Director of the HOPE (Hematology-Oncology Psychosocial and Education) Program in the Children's Center for Cancer and Blood Diseases at Children's Hospital Los Angeles..
